         SUB ARRAY WITH MAX SUM
         Description
           You are given a list of integers, and your task is to find the subarray with the maximum sum. Write a function or method to
           solve this problem efficiently and return the maximum sum.
           Input:
           n: the no of elements in the array
           nums (List of integers): A list of integers (1 <= len(nums) <= 10^5)
           Sample input:
32 SPRITE
           -1 2 3 10 -4 7 2 -5
           Sample output:
3R23CA06
           20
           Explanation:
CROST
           The max subarry sum is 20. The subarray is [2,3,10,-4,7,2]
                                                                              08238
         Source Code:
32 3BR2
           n=int(input())
           l=list(map(int,input().split()))
           s=1[0]
           ms=1[0]
           for i in range(1,n):
               s=max(l[i],s+l[i])
               ms=max(ms,s)
           print(ms)
       RESULT
